Ball Float Trap UNA 14, PN 25, UNA 16 Carbon Steel, PN 40, UNA 16A Stainless Steel, PN 40 DN 15, 20, 25

Description

UNA 14, UNA 16, UNA 16A are ball float steam traps with rolling ball valve. The steam traps can be used for all operating conditions, as they are unaffected by back pressure. They consist of a body with bolted cover and a control unit. The control unit is freely accessible after removing the cover. It can be completely replaced without having to remove the valve body from the line. A conversion of "h" design to "v" design or vice versa is possible without any problem by repositioning body and control unit. The direction of flow is indicated by an arrow, the position of installation by the word "Top" on the name plate.

- suitable for large condensate flowrates
 - "h"-design for horizontal lines
 - "v"-design for vertical lines
- (To convert "h" to "v" design or vice versa turn cover and control unit respectively)

UNA 14, UNA 16, UNA 16A

The following three different types of control units are available: Control unit "SIMPLEX": level-dependent float control particularly suitable for cold condensate. Control unit "SIMPLEX R": level-dependent float control with internal vent pipe for continuous air-venting. Control unit "DUPLEX": float control with temperature-dependent automatic air-venting of saturated steam systems.

Pressure / Temperature Rating (DIN 1092-1) UNA 14 S.G. (ductile) iron (3 E0), PN 25					
Max. allowable pressure PMA	[bar]	25	19.4	17.8	15
Max. allowable temperature TMA	[°C]	-10 / 20	200	250	350
Maximum differential pressure Δ PMX (inlet pressure minus outlet pressure)	[bar]	13*) (4)			

Pressure / Temperature Rating (DIN 1092-1) UNA 16 carbon steel (3 E0), PN 40					
Max. allowable pressure PMA	[bar]	40	30.2	25.8	23.1
Max. allowable temperature TMA	[°C]	-10 / 20	200	300	400
Maximum differential pressure Δ PMX (inlet pressure minus outlet pressure)	[bar]	22*) (13 or 4)			

Pressure / Temperature Rating UNA 16 carbon steel, CLASS 150					
Max. allowable pressure PMA	[bar]	17.3	13.8	10.2	6.5
Max. allowable temperature TMA	[°C]	-29 / 20	200	300	400
Maximum differential pressure Δ PMX (inlet pressure minus outlet pressure)	[bar]	13*) (4)			

Pressure / Temperature Rating (DIN 1092-1) UNA 16A stainless steel (13 E0), PN 40					
Max. allowable pressure PMA	[bar]	40	35.6	29.3	25.8
Max. allowable temperature TMA	[°C]	-10 / 20	100	200	300
Maximum differential pressure Δ PMX (inlet pressure minus outlet pressure)	[bar]	22*) (13 or 4)			

Pressure / Temperature Rating UNA 16A (stainless steel), CLASS 150					
Max. allowable pressure PMA	[bar]	19.3	17.0	14.0	10.2
Max. allowable temperature TMA	[°C]	-29 / 20	100	200	300
Maximum differential pressure Δ PMX (inlet pressure minus outlet pressure)	[bar]	22*) (13 or 4)			

Pressure/temperature ratings according to type of connection!

*) Depending on orifice (O)

Material of Construction	EN number	ASTM
Body UNA 14, UNA 16	1.0460 (P250GH)	A105
Body UNA 16A (stainless steel)	1.4404 (X2CrNiMo17-12-2)	A182-F316L
Cover UNA 14	5.3103 (EN-GJS-400-18-LT)	A536 60-40-18 ¹⁾
Cover UNA 16	1.0619 (GP240GH)	A216-WCB
Cover UNA 16A (stainless steel)	1.4408 (GX5CrNiMo19-11-2)	A351-CF8M
Screws UNA 14, UNA 16	1.7225 (42CrMo4)	A193-B7
Screws UNA 16A (stainless steel)	1.4980 (X6NiCrTiMoVB25-15-2)	–
Float	1.4571 (X6CrNiMoTi17-12-2)	AISI 316Ti ¹⁾
Orifice	1.4305 (X8CrNiS18-9)	AISI 303 ¹⁾
Rolling ball	1.4301 (X5CrNi18-10)	A182-F304 ¹⁾
Gasket (3)	Gaphite-CrNi	
Thermostatic capsule 5N2	Hastelloy / stainless steel	
Other parts of the control unit, gasket (17)	Stainless steel	

¹⁾ Physical and chemical properties comply with EN grade. ASTM nearest equivalent grade is stated for guidance only.

Design

Body with bolted cover. The control unit is freely accessible after removing the cover. The control unit can be replaced without having to remove the body from the line.

“h”-type for installation in horizontal pipework, flow from left to right (seen from the cover side). Conversion to obtain flow from right to left possible.

“v” -type for installation in vertical pipework with downward flow.

The traps can be supplied with different control units:

- **Duplex:** Float control with temperature-dependent automatic air-venting; GESTRA thermostatic capsule “5N2”.
- **Simplex:** Float control specially suited for the discharge of cold condensates and distillates.

- **Simplex-R:** Float control with internal vent pipe for continuous air-venting.

Optional extra:

- Purging device (float lifting lever).
- Vent hole $\frac{3}{8}$ " BSP for connecting an air-balance pipe.
- Hand-vent valve $\frac{3}{8}$ " BSP.

Connections

UNA 14

- Flanges: DIN, PN 25
- Screwed sockets: BSP and NPT threads

UNA 16, 16A

- Flanges: DIN, PN 40 and ASME Class 150
- Screwed sockets: BSP and NPT threads
- Socket-weld ends
- Butt-weld ends

UNA 16 Carbon Steel, PN 40
UNA 16A Stainless Steel, PN 40
DN 15, 20, 25

Capacity Chart

The chart shows the maximum capacity of hot condensate for float-controlled orifices (O). The cold water capacities are: Capacity multiplied by factor F.

The capacities are dependent on the differential pressure (working pressure). The differential pressure is the difference between inlet and outlet pressures and depends among other things on the run of the condensate line. If the condensate downstream of the trap is lifted, the differential pressure (working pressure) is reduced by approximately 1 bar for 7 m (or 2 psi for 3 feet) lift.

The maximum admissible differential pressure is dependent on the cross-sectional flow area of the orifice and the density of the liquid.

The standard designs of the traps for condensate from steam are available for the following maximum differential pressures: UNA 14: up to 4 or 13 bar.

UNA 16, 16A up to 4, 13 or 22 bar.

Orifice (AO)	Ø of hole [mm]
AO 4	4.8
AO 13	3.3
AO 22	2.8

Inspection & Certification

Documentation regarding material tests and in-house examination with test report EN10204 available. All inspection requirements have to be stated with the enquiry or order. After supply of the equipment certification cannot be established. Charges and extent of the above mentioned test certificates as well as the different tests confirmed therein are listed in our Price List „Test and Inspection Charges for Standard Equipment“. For other tests and inspections than those listed above, please consult us.

Application of European Directives

Pressure Equipment Directive

The equipment conforms to this directive and can be used for the following media:

UNA 14, UNA 14P
 ■ Fluids of group 2

UNA 16 and UNA 16A (stainless steel)
 ■ Fluids of group 1
 ■ Fluids of group 2

ATEX-Richtlinie

The equipment does not have its own potential ignition source and is not subject to this directive.

When installed, static electricity may arise between the equipment and the connected system. When used in potentially explosive atmospheres, the plant manufacturer or plant operator is responsible for discharging or preventing possible static charge.

If it is possible for medium to escape, e.g. through actuating mechanisms or leaks in threaded joints, the plant manufacturer or plant operator must take this into consideration when dividing the area into zones.

Supply in accordance with our general terms of business.
